Education

OCTOBER 2024 PRESENT [Master Of Artificial Intelligence/FAU](#), Erlangen, Germany

JUNE 2022 [Bachelor Of Computer Science/IUG](#), Palestine

Professional Experience

NOVEMBER 2022 – October 2025 (Remote)

[Flutter Developer, Sukuk Capital, Saudi Arabia](#)

- Designed, developed, and launched a high performance fintech crowdfunding application, facilitating investments exceeding 2 billion SAR.
- Integrated and enhanced native functionalities using Kotlin and Swift for both Android and iOS platforms.
- Leveraged modern technologies and automated data-handling techniques to interact efficiently with RESTful JSON APIs.
- Wrote comprehensive unit tests to ensure code quality, prevent regressions, and support reliable releases
- Implemented complex, data-driven user interfaces and interactive charts to provide users with intuitive statistical analysis and insights.
- Applied analytical tools such as **Mixpanel** to monitor user behavior,
- Established and maintained a robust CI/CD pipeline to automate builds, testing, and deployment, ensuring faster and more reliable delivery cycles.
- Collaborated using Agile methodologies, participating in sprints, daily stand ups, and regular retrospectives.
- Worked cross functionally with 40+ team members from design, product, and backend departments to deliver a seamless user experience.
- Worked in an English-speaking environment, collaborating daily with international team members across multiple departments.

MAY 2023 – MARCH 2024

[Flutter Developer \(Web & Mobile\) SyncMe Startup \(Part Time\)](#)

- Joined a fast paced startup environment, contributing to rapid development cycles and hands on product decisions.
- Designed and implemented a Flutter based web application to streamline admin and vendor management, significantly improving operational efficiency.
- Maintained and enhanced the company's mobile application, ensuring stability and continuous feature improvement.
- Developed a new SaaS product for e-commerce, named SyncMe, focusing on seamless integration and user experience.
- Utilized Google Cloud Functions to build scalable, event-driven backend services, enabling seamless integration with other GCP components like Firestore and other services.
- Utilized AWS Amplify and GraphQL to build scalable and responsive backend services.
- Followed Scrum methodology for project management, actively participating in sprint planning, reviews, and daily stand-ups within a cross-functional team

JUNE 2021 – SEPTEMBER 2021

[Flutter developer intern, Ministry of interiors](#)

- Designed and developed a progress tracking and planning application to streamline collaboration between managers and employees.
- Implemented Firebase as the backend for real time data storage, user authentication, and role-based access control (Admin, Team Manager, Team Member).
- Created a custom calendar view to allow users to display tasks for a specific day or an entire month directly from the home screen.
- Developed dedicated dashboards for managers and team leaders to view archived plans, monthly tasks, and add comments to specific tasks or plans.
- Enabled real time progress tracking with chat like updates and the ability to share tasks with individual team members.
- Integrated push notifications for new task/plan assignments and manager/team leader comments.
- The app restructured communication across 10 departments and reduced paperwork by 75%, significantly

improving workflow efficiency.
SEPTEMBER 2021 – JUNE 2022

Evolutionary Timetable Scheduling for Faculty of Information Technology

- Developed a Flutter web and desktop application to automatically generate class schedules for students and lecturers using an evolutionary optimization algorithm.
- Built and integrated a Flask-based API that runs the ML model (evolutionary algorithm) on the backend to search for near-optimal scheduling solutions based on constraints such as room capacity, lecturer availability, and course overlaps.
- Connected the web version to Firebase for real-time data synchronization and the desktop version to local storage for offline access.
- Designed a clean, intuitive interface with categorized views (students/lecturers) and dynamic search filtering for usability.
- Implemented full CRUD functionality for managing courses, lecturers, classrooms, and student groups.
- Reduced the manual scheduling process from several months to 30 minutes, significantly improving operational efficiency and demonstrating the value of applied AI in education management.

Side Projects:

Web App with Next.js and TypeScript

<https://abushagra.de/>

- Developed a responsive web application using **Next.js**, **TypeScript**, and **React** with modular component design.
- Implemented **API integration** for dynamic data fetching and **server-side rendering (SSR)** to improve performance.
- Applied **UI/UX best practices** with reusable components and context-based state management.
- Implemented an **API route** to handle form submissions and send emails securely via a server-side function

Contributions:

- Actively contributed to several Dart and Flutter repositories on GitHub.
- Wrote unit and widget tests for multiple components in the official Flutter repository, helping improve framework reliability.
- Fixed and closed reported issues in the Flutter repo by debugging, refactoring, and submitting well-documented pull requests.
- Contributed a feature enhancement to the popular Riverpod state management package, improving its documentation to support flutter hooks and Riverpod generator switches
- Contributed in openfoodfacts app (smooth-app)
- [Make docs/providers/future_provider compatible with toggles](#)
- [feat: big fact slide template](#)
- [Add test for error_widget.0_test.dart](#)
- [Add minimum height for MaterialBanner](#)
- [fix: Search Results Not Updating After Changing Country Without App Restart](#)

Volunteering:

- Fluttercon Berlin 2025

Skills

Dart • Flutter • Java • SQL/NoSQL • React Next Js git • Firebase • RESTful Api • Provider • Riverpod • Clean Architecture • Fintech TypeScript • Python Flask • Design Patterns • Retrofit
